

Faxitron™ Path+ Specimen Radiography System

Bigger is Better.

Optimized imaging of your largest specimens.

With no larger field of view available in the pathology market, the Faxitron Path+ system helps deliver greater efficiency for the gross lab and more timely results for the patient.

Faxitron Path+ system Features:

High-Resolution Imaging

Faxitron Path+ system's multiple levels of geometric magnification (up to 10X) allow you to image full term fetuses down to the smallest microcalcifications, all at one of the highest resolutions in the market.

Wide Energy Range

The Faxitron Path+ system's proprietary Automatic Exposure Control (AEC) selects the optimal x-ray exposure settings regardless of specimen makeup and density to ensure the highest image quality of breast tissue slices to bone decalcification.

Large Field of View

The system's large chamber and detector size accommodate a broad range of samples without sacrificing image quality. This allows the user to image intact mastectomies to femurs to full-term fetal remains, all directly in the lab.

Improved Efficiency

Routine access to high-resolution imaging allows you to generate final reports faster and with more accuracy, further improving the standard of care for your patients.

Easy to Use

Intuitive software is easily interfaced with PACS (if available) and multiple image file formats are available for a variety of digital pathology and information systems. No specialized x-ray training is required or needed.

Ergonomic Design

Fully integrated, floor standing system with heavy duty casters is easily positioned in any lab and simply plugs into any standard A/C outlet.

Remote Support

Product specialists can remotely access the system (with local authorization) to provide expert support if needed.

A comprehensive family of solutions

The Faxitron Path+ system fits right into Hologic's full range of specimen radiography solutions. Hologic has a complete set of specimen imaging products for Radiology, Surgery and Pathology to help you improve efficiency, optimize the patient experience and deliver the best outcomes possible. Talk to your representative about the solutions that can best suit your needs ensuring your patients have the best possible care when they need it most.

Faxitron™ Core System

Trident® HD specimen radiography system

Faxitron™ Path+ System

Be sure to talk with your Hologic representative about which specimen radiography solution is right for you and your patients.

*Faxitron™ Core system also known as CoreVision® System.
Faxitron Path+ system also known as PathVision™ XL System.*
